Subject Index of Volume 52

Adhesion
influence of substrate surface topography on the critical normal force in scratch adhesion testing of TiN-coated steels, 195
Alumina
wear behaviour of uncoated and WC–C-coated alumina under closed sliding, 235
Aluminium
aluminization of copper for oxidation protection, 135
corrosion behaviour of physical vapour deposition aluminium-based coatings on 2024 aluminium alloy, 289
effects of ion beam implantation on the corrosion behaviour of TiN-coated Ti–6Al–4V alloy, 159
microstructure of silver implanted with aluminium ions, 115
optimization of (Ti,Al)N films composition prepared by arc evaporation for cutting tool applications, 57
reduction of static friction between surfaces of Ti–6Al–4V and between surfaces of Ti–6Al–4V and Al-7075, 291
tribological properties of Ag/Ti films on Al_2O_3 ceramic substrates, 31
Antireflection films
wide-band anti-reflection film fabricated by C-MAG™ co-sputter technology, 99
ARC methods
how to solve problems of films coated by ARC methods, 229
Arc evaporation
optimization of (Ti,Al)N films composition prepared by arc evaporation for cutting tool applications, 57
Atomic oxygen
real-time monitor for thin film etching in atomic oxygen environments, 51

Boron
preparation of cubic boron nitride films by radio frequency bias sputtering, 87

Carbide powders
study of coatings from refractory carbide powders on some steel rods prepared by using equipment with a rotating electric arc, 275
Carbon
growth of diamond from CO_2-(C_2H_2, CH_4) gas systems, without supplying additional hydrogen gas, 205
wear behaviour of uncoated and WC–C-coated alumina under closed sliding, 235
Cathodic arc deposition
macroparticle contamination in cathodic arc coatings: generation, transport and control, 39
Ceramics
influence of the oxidation activity of metals on friction and wear of ceramic–metal systems, 153
laser assisted physical vapour deposition of ceramics, 221
plasma spraying deposition of graded metal–ceramic coatings, 211
tribological properties of Ag/Ti films on Al_2O_3 ceramic substrates, 31
Chemical vapour deposition
practical properties of chemical vapour deposition diamond tools
Chromium
control of reactive d.c. planar magnetron sputtering of chromium nitride, 243

Cobalt
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips, alloy electrodeposition and adhesion of coatings to natural rubber compounds, 17
Copper
aluminization of copper for oxidation protection, 135
nucleation and initial growth of copper deposits by high rate magnetron enhanced sputtering, 9
nucleation and initial growth of copper electrodeposits under galvanostatic conditions, 1
plating of copper in tubular holes with rotating screw electrodes, 269
Corrosion
corrosion behaviour of physical vapour deposition aluminium-based coatings on 2024 aluminium alloy, 289
effects of ion beam implantation on the corrosion behaviour of TiN-coated Ti–6Al–4V alloy, 159
the erosion and erosion–corrosion of chromized steel, 119

Deposition parameter effects
deposition parameter effects on the composition and the crystalline state of reactively sputtered molybdenum nitride, 179
Diamond
practical properties of chemical vapour deposition diamond tools, 81
Diamond films
microstructure and characterization of diamond film grown on various substrates, 105
Diamond growth
growth of diamond from CO_2-(C_2H_2, CH_4) gas systems, without supplying additional hydrogen gas, 205
Diamond-like carbon
diamond-like carbon film preparation by laser arc, 129

Electrodeposition
nucleation and initial growth of copper electrodeposits under galvanostatic conditions, 1
plating of copper in tubular holes with rotating screw electrodes, 269
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips, alloy electrodeposition and adhesion of coatings to natural rubber compounds, 17
Erosion
high temperature erosion resistance of coatings for use in gas turbine engines, 65
the erosion and erosion–corrosion of chromized steel, 119

Friction
influence of the oxidation activity of metals on friction and wear of ceramic–metal systems, 153
reduction of static friction between surfaces of Ti–6Al–4V, and between surfaces of Ti–6Al–4V and Al-7075, 291

Hard coatings
influence of substrate surface topography on the critical normal force in scratch adhesion testing of TiN-coated steels, 195
optimization of (Ti,Al)N films composition prepared by arc evaporation for cutting tool applications, 57
process and property relationships in hard coatings made by plasma- and ion-assisted methods, 261

© 1992 — Elsevier Sequoia. All rights reserved

Hydrogen
growth of diamond from CO_2-(C_2H_2, CH_4) gas systems, without supplying additional hydrogen gas, 205

Induction heating
a study on residual stresses in surface hardening by high frequency induction heating, 281
Ion implantation
effects of ion beam implantation on the corrosion behaviour of TiN-coated Ti–6Al–4V alloy, 159
ion implantation of cutting tools, 297
Iron
the tribological behaviour of various plasma sprayed coatings against cast iron, 169

Laser methods
diamond-like carbon film preparation by laser arc, 129
laser assisted physical vapour deposition of ceramics, 221

Macroparticles
macroparticle contamination in cathodic arc coatings: generation, transport and control, 39
Magnetrons
nucleation and initial growth of copper deposits by high rate magnetron enhanced sputtering, 9
control of reactive d.c. planar magnetron sputtering of chromium nitride, 243
Microstructure
microstructure and characterization of diamond film grown on various substrates, 105
microstructure of silver implanted with aluminium ions, 115
Molybdenum
deposition parameter effects on the composition and the crystalline state of reactively sputtered molybdenum nitride, 179
X-ray diffraction of MoS_2 coatings prepared by ion beam assisted deposition, 93
Multilayer coatings
development and testing of multilayer physically vapour deposited-coatings for piston rings, 145

Nickel
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips, alloy electrodeposition and adhesion of coatings to natural rubber compounds, 17
Nitrides
characterization of ion-plated silicon nitride thin films, 187
control of reactive d.c. planar magnetron sputtering of chromium nitride, 243
deposition parameter effects on the composition and the crystalline state of reactively sputtered molybdenum nitride, 179
preparation of cubic boron nitride films by radio frequency bias sputtering, 87
titanium nitride coating for aero engine compressor gas path components, 251
Nitrogen
optimization of (Ti,Al)N films composition prepared by arc evaporation for cutting tool applications, 57
Nucleation
nucleation and initial growth of copper deposits by high rate magnetron enhanced sputtering, 9
nucleation and initial growth of copper electrodeposits under galvanostatic conditions, 1

Oxidation
aluminization of copper for oxidation protection, 135
influence of the oxidation activity of metals on friction and wear of ceramic–metal systems, 153

Physical vapour deposition
corrosion behaviour of physical vapour deposition aluminium-based coatings on 2024 aluminium alloy, 289
development and testing of multilayer physically vapour deposited-coatings for piston rings, 145
laser assisted physical vapour deposition of ceramics, 221
titanium nitride coating for aero engine compressor gas path components, 251
Plasma deposition
plasma spraying deposition of graded metal–ceramic coatings, 211
process and property relationships in hard coatings made by plasma-and ion-assisted methods, 261
Plasma spraying
the tribological behaviour of various plasma sprayed coatings against cast iron, 169

Radio frequency
preparation of cubic boron nitride films by radio frequency bias sputtering, 87

Silicon
characterization of ion-plated silicon nitride thin films, 187
Silver
microstructure of silver implanted with aluminium ions, 115
tribological properties of Ag/Ti films on Al_2O_3 ceramic substrates, 31
Sputtering
control of reactive d.c. planar magnetron sputtering of chromium nitride, 243
deposition parameter effects on the composition and the crystalline state of reactively sputtered molybdenum nitride, 179
nucleation and initial growth of copper deposits by high rate magnetron enhanced sputtering, 9
preparation of cubic boron nitride films by radio frequency bias sputtering, 87
wide-band anti-reflection film fabricated by C-MAG™ co-sputter technology, 99
Steel
influence of substrate surface topography on the critical normal force in scratch adhesion testing of TiN-coated steels, 195
study of coatings from refractory carbide powders on some steel rods prepared by using equipment with a rotating electric arc, 275
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips, alloy electrodeposition and adhesion of coatings to natural rubber compounds, 17
the erosion and erosion–corrosion of chromized steel, 119
Stress
a study on residual stresses in surface hardening by high frequency induction heating, 281
Sulphur
X-ray diffraction of MoS_2 coatings prepared by ion beam assisted deposition, 93
Superalloys
high temperature erosion resistance of coatings for use in gas turbine engines, 65
Surface topography
influence of substrate surface topography on the critical normal force in scratch adhesion testing of TiN-coated steels, 195

Thin films
characterization of ion-plated silicon nitride thin films, 187

real-time monitor for thin film etching in atomic oxygen environments, 51
wide-band anti-reflection film fabricated by C-MAG™ co- sputter technology, 99
Titanium
effects of ion beam implantation on the corrosion behaviour of TiN-coated Ti–6Al–4V alloy, 159
influence of substrate surface topography on the critical normal force in scratch adhesion testing of TiN-coated steels, 195
optimization of (Ti,Al)N films composition prepared by arc evaporation for cutting tool applications, 57
reduction of static friction between surfaces of Ti–6Al–4V, and between surfaces of Ti–6Al–4V and Al-7075, 291
titanium nitride coating for aero engine compressor gas path components, 251
tribological properties of Ag/Ti films on Al_2O_3 ceramic substrates, 31
Tribology
the tribological behaviour of various plasma sprayed coatings against cast iron, 169
tribological properties of Ag/Ti films on Al_2O_3 ceramic substrates, 31
Tungsten
wear behaviour of uncoated and WC–C-coated alumina under closed sliding, 235
Vanadium
effects of ion beam implantation on the corrosion behaviour of TiN-coated Ti–6Al–4V alloy, 159
reduction of static friction between surfaces of Ti–6Al–4V, and between surfaces of Ti–6Al–4V and Al-7075, 291
Wear
influence of the oxidation activity of metals on friction and wear of ceramic–metal systems, 153
wear behaviour of uncoated and WC–C-coated alumina under closed sliding, 235
X-ray diffraction
X-ray diffraction of MoS_2 coatings prepared by ion beam assisted deposition, 93
Zinc
study of Zn–Ni and Zn–Co alloy coatings electrodeposited on steel strips, alloy electrodeposition and adhesion of coatings to natural rubber, 17
